

SUBSTANCE ABUSE DETECTION

PROFESSIONAL GRADE PORTABLE & FIXED BREATHALYSERS
DRUG, EXPLOSIVE AND NARCOTICS DETECTION

FAST, SAFE AND ACCURATE
BREATHALYSERS FROM PSA.

www.psafrica.co.za

PSA Africa are the Lifeloc Approved exclusive distributors for Sub-Saharan Africa and are equipped to provide maintenance, calibration and policy formulation training for all the equipment and instrumentation supplied. Our extensive professional grade product range caters for the detection of alcohol, drugs, explosives and narcotics.

ALCOHOL TESTING

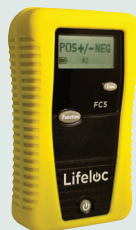

PSA Africa supplies, maintains and provides training on a wide range of Lifeloc professional grade portable and fixed breathalysers. Lifeloc Technologies breathalysers are manufactured in the USA under ISO 9001:2008 quality management standards and the products are DOT / NHTSA and SAI Certified. Locally the Lifeloc devices are recognised by SABS as being top-end products due to their use of a full size (1 inch) fuel cell sensor and deep lung sampling methods making it the most accurate method of obtaining a breath alcohol concentration. The Lifeloc brand is used extensively by law enforcement, traffic police and large industry because of their high levels of accuracy and outclasses other low cost domestic use breathalysers available.

PORTABLE

LIFELOC FC 5 HORNET

A precision, handheld breathalyser that makes testing for the presence of alcohol as easy as possible. Ideally suited to zero alcohol tolerance environments such as oil & gas refineries, construction, maritime, mining and general industry.

- No mouthpieces or special attachments required
- 3 Operating test modes (rapid high volume; precise testing, open container)
- LCD display with easy to interpret icons and automatic day / night backlit display

PORTABLE

LIFELOC FC 10

A portable, high precision, rugged and multifunctional breathalyser that includes both direct BAC and passive testing. Known for its long life, accuracy and fast recovery times it's commonly used by law enforcement and industry professionals working in safety sensitive environments.

- Menu driven software guides users through testing process
- Alcohol specific testing in several test modes (auto, manual & passive)
- Repeatable, rapid testing with immediate response on negative results and less than 10 seconds on positive

PORTABLE

LIFELOC FC 20

Most advanced, feature rich professional breathalyser in the Lifeloc range. It is also the easiest to use, most powerful and versatile alcohol tester on the market offering a fully integrated solution for all screening and evidentiary alcohol testing requirements.

- Data Management Solutions that are fully customizable for individual needs
- On-board memory & printing
- Alcomark software allows test results to be downloaded to a PC

FIXED

LIFELOC FC 5 SENTINEL

Fixed, wall-mounted breathalyser that facilitates operator-free breath alcohol testing in high volume, safety sensitive work environments. This automated system can easily be integrated into most access control systems including turnstiles and security controlled access points.

- No human intervention, reduces fraudulent testing and alleviates entry-point bottlenecks
- Ideal for zero tolerance environments and doesn't require a mouthpiece
- Rugged brushed anodized aluminium housing designed for rough conditions
- Rapid testing with results in seconds

DRUG, EXPLOSIVES & NARCOTICS DETECTION

PSA supplies accurate, easy to use portable equipment for the detection of illegal explosives, weapons and drugs.

PORTABLE

XCAT

A rapid, portable detection system for explosives, narcotics and gunshot residue - perfect for trace and bulk detection. The multifaceted optical detection system allows users to test pills, powders, residue and liquids found on surfaces and hands. Designed to screen an area or person quickly and effectively, making it suitable for law enforcement, crime scenes, ports, airports and national key points.

- Easy to use with simple red or green light alerts
- Safe alternative to colorimetric tests with no exposure to chemicals or broken glass
- No calibration, long battery life and accurate results

PORTABLE

NOBLE SPLIT SPECIMEN DRUG SCREENING

A patented method of drug screening that is simple to use, tamper proof and splits the specimen to allow for GC/MS confirmation. Can be customised to detect up to 12 different drugs quickly and accurately.

- Eliminates urine handling and donor tampering
- Efficient approach for on-site drug testing
- Detects presence of multiple drugs with laboratory accuracy within minutes.
