

Cairns® XF1 Fire Helmet

WHEN YOU GO IN, WE GO IN WITH YOU.

PART TRAILBLAZER. PART TOP GUN. ALL CAIRNS.

MEETING FIREFIGHTER NEEDS: BENEFITS OF THE CAIRNS XF1 FIRE HELMET

REDUCED SNAGS

The Cairns XF1 Fire Helmet has been engineered as much for comfort and fit as safety. The most obvious feature is what it lacks—the XF1 Helmet is brimless. While untraditional, the lack of a brim makes it easier to crawl into tight spaces and retain your helmet.

INTEGRATED ACCESSORIES

The Cairns XF1 Fire Helmet offers several optional accessories, like a secondary (ocular) visor, lighting, and communications. All are integrated seamlessly into the design, retaining its sleek profile.¹

EASY TO CLEAN

The Cairns XF1 Fire Helmet's modular design allows it to be quickly disassembled for thorough inspection, care and maintenance. Plus, the helmet's soft goods are removable, washable and replaceable—all without the use of tools.

THE RIGHT TIME FOR SOMETHING NEW

We know the MSA Cairns XF1 Fire Helmet looks entirely different than the helmet you're wearing now. And that's the point. At MSA Cairns, we're always striving to innovate helmet technology—which is why we're always talking to firefighters about their gear. From these conversations, we knew it was the right time to bring a European-style fire helmet to North America.

The design of the National Fire Protection Association (NFPA) 1970-compliant Cairns XF1 Fire Helmet capitalizes on the expertise of firefighters who wear jet-style fire helmets, while blending in the needs of the North American firefighter.

LIGHTING THE WAY

This compact light accessory is housed inside the helmet, reducing exposure to heat, flames, and impact. The strategic placement of LED lights on either side of the helmet improves visibility in dark conditions without detracting from others' vision.

PERSONALIZED FIT

Several easy-to-find adjustments can be made enabling the fire helmet fit to be customized to the individual. When it's all said and done, the XF1 Helmet doesn't just fit firefighters—it fits most of them comfortably.²

CUSTOMIZED LOOK

The Cairns XF1 Fire Helmet is available in four colors, black, white, yellow, and red, and two finishes, matte and glossy, for firefighters to choose a look that fits their style. Front plates, in a variety of colors, black pre-printed and custom printed options, are available.

¹ The Cairns XF1 Fire Helmet is certified to the NFPA 1970: 2025 standard. Adding the helmet-mounted lighting accessory (part number GA1484) and/or the communication headset (part number GAY10212232116000X) will result in the helmet no longer being certified to NFPA 1970:2025. Both accessories are rated for ATEX Zone 1 and IP56.

² This information based on Beta trial of 250 participants with various facepieces, including competitor SCBA.

CAIRNS XF1 FIRE HELMET FIREFIGHTER-DRIVEN FEATURES

RELIABLE DESIGN, EXCELLENT PROTECTION

Designed to withstand the rigors of structural fire fighting:

- Lightweight shell molded from high heat-resistant thermoplastic provides protection against typical fire scene hazards.
- Full-coverage impact cap combined with the fitted suspension system allows for equal distribution of forces.
- Shell, face shield, and earlaps, provide coverage from impacts, projections, heat, and flames.
- Brimless style prevents shifting and bumping.
- Increased head mobility allows for expanded field of view, especially upward.

EASY CARE TO SAVE TIME & MONEY

Designed to be quickly disassembled for care and maintenance as required by NFPA 1851:

- The modular design allows for thorough inspection, cleaning, and replacement of parts.
- Soft goods are removable, washable, and replaceable with minimal effort and no tools.³ Wash cycle testing conducted at MSA labs showed that the soft goods, including the chinstraps, withstood 52 wash cycles.⁴
- Both helmet sizes use many of the same components to minimize spare parts management and costs.

COMFORT THROUGH INNOVATION

Designed for a comfortable fit and easy adjustability:

- Robust, yellow components designate helmet interaction points for the user.
- Front headband angle adjusts to establish proper fit when wearing a hood or SCBA facepiece.
- Three-position ratchet adjustment provides for individualized/customizable fit.
- Pivoting, three-point chinstrap automatically aligns to the proper wearing angle with or without facepiece.

³ MSA does not recommend washing suspension straps due to their key role in dissipating impact. Follow the Product Instructions for removing and replacing suspension straps.

⁴ When washed according to instructions provided.

MSA CAIRNS XF1 FIRE HELMET ACCESSORIES

MSA offers a variety of integrated accessories designed to maximize available headroom while minimizing snag hazards.

LIGHT MODULE

Unique, compact light located inside the helmet improves visibility in dark conditions without detracting from others' vision:

- Internal location reduces the light's exposure to heat, flames, and impact.
- Light module is ATEX (Zone 1, IP56)-rated.
- Light placement on each side of the helmet allows for expanded field of view.
- Yellow on/off switch is easy to see and rubberized for better grip with gloved hands.
- Uses AAA batteries for up to 10 hours of continuous operation.
- Flashing light indicates remaining battery level.
- Light module weighs just 3.5 oz. (99 g) with batteries—about 33% lighter than other helmet-mounted flashlights.
- Adding the helmet-mounted lighting accessory, part number GA1484 will result in the helmet no longer being certified to NFPA 1970:2025.

INTEGRATED OCULAR VISOR

The optional ocular visor provides additional eye protection that is easy to deploy:

- Patented pivot adjustment system allows the visor to articulate to and away from the face, helping to provide gap-free protection even when the user is wearing corrective lenses.
- Visor is easy and quick to remove to clean or replace with no tools. Great secondary eye protection when a full-face protection is not needed.
- Protective anti-scratch coating helps ensure extended lifetime.
- Unique wide field of view in all directions.
- Compliant to ANSI/ISEA Z87.1:2015 as an impact protector—similar to safety eyewear typically worn by firefighters for nonstructural fire responses such as motor vehicle accidents.
- Adding the ocular visor does not affect compliance with NFPA 1970:2025.

INTERNAL COMMUNICATION HEADSET

The internally-mounted headset snaps easily inside the helmet, providing incoming communication right to the ear, where it's needed most:

- The headset can be installed without tools and does not affect how the helmet fits on the firefighter's head.
- Users have the option of one or two integrated speakers.
- The flexible, noise-cancelling Electret boom microphone extends more than 3 in. (76 mm) in length and can be used with or without SCBA facepiece.
- When not in use, the microphone stows safely out of the way behind the wearer's head.
- Fire-retardant cable download offers NEXUS (7.1 mm jack, four pole) connecting plug.
- Headset adds minimal weight (3.5 oz. [99 g] for one speaker or 4.4 oz. [124 g] for two speakers).
- This accessory is ATEX (Zone 1, IP56)-rated
- The headset operates with various push-to-talk (PTT) modules, such as MSA HandyCom, enabling connection to a radio:
 - Housing with large, easy-to-push button
 - Download cable to the radio with connection plug
 - Belt/strap attachment via durable integrated clip
- No batteries needed; powered by the radio through the PTT.
- Adding the communication headset, part number GAY10212232116000X will result in the helmet no longer being certified to NFPA 1970:2025.

FRONT PLATES*

- 11 pre-printed black plates, including those for ranks, EMS, and Chaplain.
- Plates available in 9 colors.
- Can be customized with metal badge, molding, or multi-color printing.
- Can be removed in a few seconds without special tools.

XFI Luminous Front Plate (GA1150-32)

XFI Front Plate, Lieut. w/1 trumpet (GA1150-N4)

*Minimum order quantities apply to customized front plates. Pre-printed black plates and blank colored plates can be ordered as single pieces.

MSA—The Safety Company

Established in 1914, MSA Safety Incorporated is the global leader in the development, manufacture, and supply of safety products that protect people and facility infrastructures. Many MSA products integrate a combination of electronics, mechanical systems, and advanced materials to protect users against hazardous or life-threatening situations. The company's comprehensive product line is used by workers around the world in a broad range of markets, including the oil, gas, and petrochemical industry, the fire service, the construction industry, mining, and the military. MSA's core products include self-contained breathing apparatus, fixed gas and flame detection systems, portable gas detection instruments, industrial head protection products, firefighter helmets and protective apparel, and fall protection devices. With 2020 revenues of \$1.35 billion, MSA employs approximately 5,200 people worldwide. The company is headquartered north of Pittsburgh in Cranberry Township, PA, and has manufacturing operations in the United States, Europe, Asia, and Latin America. With more than 40 international locations, MSA realizes approximately half of its revenue from outside North America. For more information visit MSA's website at www.MSAafety.com.

Our Mission

MSA's mission is to see to it that men and women may work in safety and that they, their families, and their communities may live in health throughout the world.

MSA: WE YOU GO IN, WE GO IN WITH YOU.
