ABOUT SKED® BASIC RESCUE SYSTEM

The Sked® Basic Rescue Stretcher provides safe and reliable patient transport in confined spaces, high-angle and technical rescue environments. Its versatile design allows for both horizontal helicopter hoisting and vertical lifting in caves or industrial spaces.

When the patient is secured, the stretcher becomes rigid for improved stability and protection. Made from durable plastic, it allows rescuers to safely extricate patients through tight or difficult spaces.

The stretcher rolls into a tough Cordura backpack for compact storage and transport. The complete system weighs 8.6 kg and is ready for most rescue applications.

FEATURES & BENEFITS

- **Versatile Rescue Use** - Suitable for confined space, high-angle and land-based rescues.
- **Horizontal & Vertical Hoisting** - Designed for helicopter lifting or vertical rescue in caves and industrial spaces.
- **Rigid Patient Support** - Stretcher becomes rigid once the patient is secured for improved stability.
- **Durable Construction** - High-strength plastic built to withstand harsh environments and extreme temperatures.
- **Compact & Portable** - Rolls into a Cordura backpack for easy transport and storage.
- **Lightweight System** - Complete rescue system weighs only 8.6 kg.

SPECIFICATIONS

Sked® Basic Rescue System Includes:

- **Sked® Stretcher** - Flexible, high-strength plastic stretcher with reinforced straps and steel buckles. Durable in extreme environments down to -120°F.
- **Cordura Backpack** - Heavy-duty backpack for storage and transport that converts into a towing harness.
- **Horizontal Lift Slings** - Pair of 9,000 lb rated slings for helicopter or haul system lifting.
- **Tow Strap** - 6 ft strap with snap hooks for towing the stretcher across terrain.
- **Removable Webbing Handles** - Additional handles allow up to 8 rescuers to carry the stretcher.
- **Steel Locking 'D' Carabiner** - 9,000 lb rated carabiner for secure hoisting attachment.
- **Vertical Lift Sling** - 30 ft rescue rope designed for vertical lifting operations.
