

The Safety Company

MSA Safety FP solutions

WE KNOW WHAT'S AT STAKE.

The Dangers of Working at Height

Working at height accounts for around a quarter to a third of all fatal workplace accidents varying by country. Falls often occur due to works on unstable surfaces, using ladders without proper protection, or overstretching beyond a safe reach.

For more than 100 years, MSA Safety has been protecting people at work. Today it is at the forefront in both the supply and the range of innovative fall protection solutions to serve the needs of your crew when working at height.

V-SERIES® Full-Body Harnesses

Because the safest fall protection is the one you'll actually want to wear, each V-SERIES harness includes unique features to deliver exceptional comfort—so you can focus on your work, not your harness:

Superior comfort

The exclusive racing style buckle allows for a close, comfortable fitting harness—eliminating the need for bulky chest straps or cumbersome buckles.

Flexibility

The racing style buckle creates an athletic cut, contouring the harness to the body for improved upper torso movement on the job.

Superior comfort

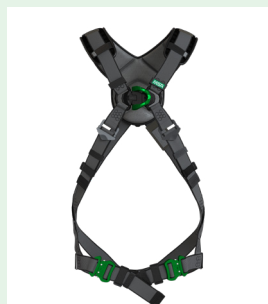

Pull-down adjustment on each harness allows you to quickly get the right fit, that last throughout the work day.

V-SERIES Self-Retracting Lifelines

The V-SERIES Self-Retracting Lifelines are built to keep your team safe while boosting productivity—all in a durable, high-performance design inspired by real user needs

Comfort You Can Feel

Engineered with lightweight, field-tested composites and metals, these lanyards are some of the most compact and comfortable you will ever use—helping your team stay focused and fatigue-free.

Instant Visual Inspection

Clear housing design lets you easily check critical internal components at a glance, so you can keep safety top of mind without slowing down.

Built to Last

Crafted with high-grade stainless steel and rugged engineered plastics, every unit is rigorously tested to withstand the toughest conditions—day in and day out.

Next-Level Safety

Equipped with advanced shock absorption technology, these lanyards deliver maximum performance with low clearance, ensuring your team stays protected even in tight spaces

Horizontal Temporary Lifelines

Through intuitive and toolless installation features, MSA's Temporary horizontal lifelines can help save time on the jobsite.

Tool-Free Installation

Integrated locking and tensioning mechanism on the handle – eliminating the need for nuts, bolts, and wrenches.

Single-Worker Setup

Lightweight and flexible to help make installation easy to complete by a single worker. Also, locking and tensioning mechanisms are on the same side – no need to travel back and forth for setup.

Clear Safety Indicators

Easy-to-read red and green visual indicators let the user know the system is locked, tensioned, and ready for use (cable only).

Enhanced Mobility with 100% Tie-Off

Patented bypass shuttles help 2 users maintain 100% tie-off – increasing mobility without sacrificing safety.

Confined Space Equipment

Confined Space Entry Kit

Protect workers in tight places with MSA's complete Confined Space Entry Kit. The entire Kit takes only minutes to set up; no tools are needed.

MSA Tripod

Provides stable base support. Certified to EN 795: 2012 and CEN/TS 16415 for up to 2 workers

MSA Rescuer

Provides fall arrest protection to the entrant; enables top-side attendant to safely and quickly retract a stricken worker without entering the confined space.

MSA Winch

Lowers, lifts and positions personnel and materials. The complete system is certified to Machinery Directive 2006/42/EC.

MSA—The Safety Company

Established in 1914, MSA Safety Incorporated is the global leader in the development, manufacture, and supply of safety products that protect people and facility infrastructures. Many MSA products integrate a combination of electronics, mechanical systems, and advanced materials to protect users against hazardous or life-threatening situations. The company's comprehensive product line is used by workers around the world in a broad range of markets, including the oil, gas, and petrochemical industry, the fire service, the construction industry, mining, and the military. MSA's core products include self-contained breathing apparatus, fixed gas and flame detection systems, portable gas detection instruments, industrial head protection products, firefighter helmets and protective apparel, and fall protection devices. With 2020 revenues of \$1.35 billion, MSA employs approximately 5,200 people worldwide. The company is headquartered north of Pittsburgh in Cranberry Township, PA, and has manufacturing operations in the United States, Europe, Asia, and Latin America. With more than 40 international locations, MSA realizes approximately half of its revenue from outside North America. For more information visit MSA's web site at www.MSAsafety.com.

Our Mission

MSA's mission is to see to it that men and women may work in safety and that they, their families, and their communities may live in health throughout the world.
