FEATURES AND BENEFITS

The self-contained compressed air system **AirXpress 3** offers increased **safety, comfort and flexibility**.

Engineered for critical environments, it is perfect for various sectors including petrochemical, natural gas, metallurgy, pharmaceuticals, municipal water management, search and rescue, fire services and hazardous materials handling.

ERGONOMIC CARRIER

- > New design, adapts to your body shape.
- > Backplate is made of polyamide reinforced with fiberglass.
- > Withstands high heat and flames.

G1 FULL FACE MASK

- > Increased field of vision.
- > Optional spectacle frame
- > Available in large, medium and small sizes
- > Improve faceblank design for a better fit and more comfort.

SHOULDER & CHEST STRAP

- > The chest strap improves the carrying Stability.
- > The shoulder straps feature a buckle-type design, allowing the air line to be interchanged between the left and right sides to meet the usage habits of different operators.

AX DEMAND VALVE

- > Freedom of movement in all directions
- > Designed for high-flow and low resistance.
- > Easy to clean and maintain, without tools.
