BATCH TESTING

The **Hero** Hard Hat has been optimally designed for the industry sector. It incorporates superior quality, injection moulded shells which provide protection and comfort. The unique all-in-one solution can incorporate earmuffs and visors as well as a cap lamp clip with 2 light positions. The cable management system ensures cables are safely contained to avoid accidents. Printing of a company logo is made possible with our in-house printing solution.

FEATURES

- Integrated cap lamp bracket with 2 positions
- Available in 12 standard colours
- 100% Virgin HDPE (high-density polyethylene with UV inhibitor) that ensures consistent quality
- Light weight
- Exceptional impact protection
- Optional company branding
- Tested to 5000 Volts
- Adjustable headband
- Replaceable foam sweatband
- 4 point Hero ratchet liner for quick, single-handed adjustment
- Adjustment straps

APPLICATIONS

- Oil, Gas and Petrochemical
- Mining
- Construction
- Confined spaces
- Electrical environments
- Working at heights

HEAT HERO

This model is designed with protective properties in high heat applications, such as radiant heat in furnace and welding work. Maximum heat exposure of 180° C; maximum ambient heat exposure of 100° C. Exceeds the applicable requirements for a Type 1 hardhat as outlined in SANS 1397:2003.

APPROVALS & QUALITY ASSURANCE

PPE Category II utilizing the SANS/EU Standards: MASC 21-8355 · SANS (EN) 1397:2003 Industrial Safety Helmets

Hero Electrical Insulation Approval:

Approved to the optional electrical insulation requirement of 440VAC from EN397. This test is a current leakage test performed in 3 different conditions to ensure no risk of the electrical current being transmitted to the wearer in case a powered wire comes into contact with the helmet. Tested to 5000 Volts.
