# RESPIRATORY PROTECTION

At PSA Africa, we understand the risks posed by airborne hazards in the workplace. That's why we provide complete Respiratory Protection systems and solutions designed to meet industry standards, reduce exposure to harmful contaminants, and safeguard personnel in all working environments.

## ADVANTAGE SERIES

The Advantage Series provides reliable, comfortable respiratory protection, featuring the 200LS Half Mask and 2300 Full Face Mask.

The 3100 Full Face Mask has a single port, and the 3200 offers a double port—both compatible with a wide range of filters and cartridges for demanding work environments.

## SCBA PROTECTION

PSA Africa's AirXpress3 and M1 SCBA systems provide reliable, positive-pressure respiratory protection in high-risk environments.

Engineered for comfort, durability and extended wear. They deliver a consistent supply of breathable air while reducing fatigue. With ergonomic harnesses, adjustable demand valves, and modular design, these systems offer superior mobility, visibility and operational flexibility for firefighting, rescue and industrial applications.

## SCBA MASKS

The MSA G1 Full Face Mask is engineered to deliver advanced respiratory protection in the most demanding environments.

Designed for use with MSA SCBA systems, it provides a secure, positive-pressure seal for maximum safety. The low-profile design offers an enhanced field of vision, while the durable visor and ergonomic harness ensure comfort, clear visibility and dependable performance for firefighting and emergency response operations.

## RESPIRATORY FILTERS & CARTRIDGES

PSA Africa offers a comprehensive range of high-performance filters and cartridges designed to protect against a wide variety of gases, vapours and particulate hazards.

Compatible with MSA respirators, they deliver reliable, low-breathing-resistance protection and a secure fit. Ideal for hazardous environments, they help ensure safe and compliant respiratory protection across multiple applications.

## ESCAPE RESPIRATORS

PSA Africa's range of Escape Respirators provides fast, reliable respiratory protection in emergency situations.

Solutions such as the MSR 2, ELSA Set and miniSCAPE are designed for quick donning, ease of use and dependable performance. Helping workers safely escape from hazardous environments when seconds matter.

## DISAPOSABLE MASKS

PSA Africa's Sonic range of disposable masks offers reliable protection against particulate hazards and is available in FFP1, FFP2, and FFP3 options.

Designed for comfort, secure fit, and low breathing resistance, these masks are ideal for industrial, maintenance, and general work environments, ensuring compliant everyday respiratory protection.

## COMPRESSED AIRLINE BOX

The MSA Airline box system provides a reliable supply of clean, breathable air for air-fed respiratory systems in hazardous environments.

Engineered with a high-efficiency coalescing filter and activated carbon stage, it removes oil mist, particulates, and hydrocarbon vapours to help maintain air quality standards. With controlled airflow and multiple outlet connections, it delivers dependable performance for industrial, mining, chemical, and maintenance applications.
