

Upgrade Your Gas Detector to the ULTIMA® X5000 Gas Monitor

10 Reasons Why

1. Global Leader

With over 100 years of safety experience, MSA is one of the few suppliers of fixed gas and flame detection (FGFD) technology that develops and manufactures a complete range of products. MSA provides solutions that not only help enhance worker safety and protect facilities, but also decrease the overall cost of ownership.

2. Product Quality

MSA is recognized as a high quality brand—we never short-change on quality and safety. Our continuous investment in research and development ensures our systems always meet the rigorous demands of the environments they are used in.

3. You Will Know When It's Time to Calibrate

The “self-check” ability of our XCell® Sensors validates that the sensor is operating normally. TruCal® adjusts for sensitivity and displays alerts on the OLED screen when calibration is needed for CO and H₂S sensors.

4. Perfect Retrofit

Uses identical mounting footprint as the previous ULTIMA® X models, ensuring quick and easy upgrades. Existing fittings, accessories, and cables can be reused, saving time and resources.

5. Labor & Maintenance Time

Safely disconnect XCell® digital sensors under Power – eliminating the hot work permit requirement for a quick sensor replacement.

Extended
Calibration
Intervals

Validated
Performance

Automated
Pulse Checks

**SAFEGUARDING PEOPLE,
PLACES & THE PLANET.**

6. Dual Sensing

Double your sensing power and improve your detection coverage by using two sensors on one transmitter.

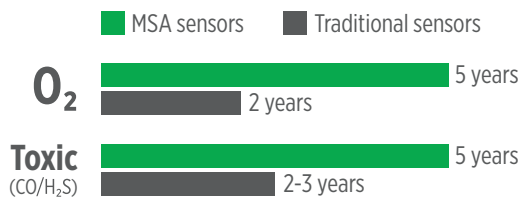

7. Remote Calibration

Take advantage of remote sensor calibration in hard-to-reach areas and complete function test from a safe and convenient location with the CalGard Remote Calibration Adapter.

8. Sensor Life Time

Thanks to the lead-free non-consuming components, our XCell® oxygen sensor lasts significantly longer than traditional technology used in the industry.

Bluetooth®

9. Intuitive Communication

Offers a wide range of communication options including Bluetooth® Wireless Technology and our exclusive X/S Connect app. A highly visible organic LED (OLED) display and an intuitive design offers clear status indication and ease of use—no need for any tool or controller.

10. Lifetime Value

MSA products and solutions are of the highest quality and offer maximum reliability. Durability of parts and materials helps ensure reduced lifetime ownership costs. The ULTIMA® X5000 Gas Monitor represents an investment in long term worker safety.
